PROFESSIONAL SUMMARY

Aspiring Data Scientist with a strong foundation in Python, Machine Learning, and Deep Learning. Top 10 finalist in the "Pupilica AI Hackathon," demonstrating practical skills in integrating AI APIs into user-friendly applications. Passionate about Natural Language Processing (NLP) and building scalable data solutions. Proven ability to apply various ML algorithms for classification tasks and currently expanding expertise in advanced NLP architectures.

SKILLS

Programming Languages

Python (Advanced), SQL, Bash/Shell Scripting

Machine Learning & AI

TensorFlow, Keras, Scikit-learn, Pandas, NumPy, Google Gemini API

Tools & Platforms

Git/GitHub, Linux (Ubuntu/Debian), VS Code, Jupyter Notebooks

Core Concepts

Supervised/Unsupervised Learning, Data Preprocessing, Model Evaluation, OOP, API Integration

Languages: Turkish (Native), English (Intermediate)

PROJECTS

Zettelkasten AI Notes

Python, PyQt5, SQLite, Google Gemini AI

- A desktop application built with PyQt5 for efficient knowledge management using the Zettelkasten method. It allows users to create, edit, and link notes, supports Markdown for rich content, and provides a real-time preview. It stores all data in a local SQLite database. A key feature is its ability to use Google Gemini AI to generate Zettelkasten-style notes from PDF documents and automatically suggest relevant links between them.
